

MAINA ERIC KARIUKI

ICT Professional

☎ +254741909607 ✉ erickaris0521@gmail.com 📍 Murang'a, Kenya 🔗 [My Portfolio](#)

🌐 [LinkedIn](#) 🐙 [Github](#)

PROFILE SUMMARY

Motivated ICT professional with hands-on experience in web development, IT support, and digital design. Skilled in transforming technical ideas into practical solutions, managing digital platforms, and delivering meaningful results. Experienced in managing projects, coordinating technical workflows, and deploying live solutions. Adaptable, self-driven, and eager to contribute across diverse areas of computing and ICT, with strong problem-solving, communication, and teamwork skills.

CORE COMPETENCIES

Systems Administration & ICT Support

- Hardware/software maintenance, LAN/WAN networking, troubleshooting
- High-volume printing, scanning, and document management
- Providing user support and assisting clients with ICT tools and systems
- Operating system troubleshooting for update, boot and driver failures
- Advanced operating system deployment, including multi-boot configurations with Windows, and Linux Distributions
- Enterprise systems administration and structured data-handling practices

Cybersecurity, Data Protection & Threat Defense

- Web security and vulnerability testing (example tool: Burp Suite)
- Data privacy, encryption protocols, and secure digital handling
- Secure API design practices (authentication, request validation and protection of secret keys)
- Secure webhook handling and verification for third-party integrations
- Basic secure deployment practices for public-facing web systems
- Cyber threat intelligence, attack vector analysis, and social engineering risk mitigation
- Incident response protocols and cryptographic standards
- Vulnerability assessment and analysis, including XSS and SQL injection testing
- Secure software development lifecycle (SDLC) practices

Software Development & Data Management

- Python, JavaScript, HTML5, CSS3, responsive web design, hosting management
- Developing secure and functional web solutions
- Integration of mobile payment APIs (M-Pesa / Daraja APIs – STK Push, callbacks and transaction verification)
- Backend automation, API integration and workflow automation using Python and web frameworks
- Good understanding of Artificial Intelligence concepts and automation workflows for improving business processes and system efficiency
- Version control using Git and collaborative code management
- React, TypeScript, and Python/Flask for modern web application development
- Progressive Web Apps (PWAs), accessibility, and usability standards
- Database design, schema optimization, and Supabase integration

Design & Branding

- Basic UI/UX wireframing and corporate identity
- Adobe Photoshop/Illustrator and Canva for visual assets
- Professional graphic design, logo design, and brand identity development
- Advanced photo editing, image manipulation, and visual asset creation
- Visual content creation for digital and print media

Project Management & Corporate Skills

- Managing multiple ICT projects from planning to delivery
- Project coordination, time management, and workflow optimization
- Exposure to customer interaction, conflict management, and business communication
- Technical communication and presentation skills
- Professional online brand development
- ATS-optimized resume development and technical interviewing
- Agile problem solving

Artificial Intelligence & Automation

- Generative AI and prompt engineering, including foundation models, transformers, and tokenization
- Sentiment analysis and application of GenAI tools for productivity and automation
- Ethical and responsible AI deployment considerations

EDUCATION

2023 – Present	Bachelor of Science in Computer Science University of Embu Ongoing
12/2022 – 01/2023	Computer Packages & Cyber Café Operations Digital Cyber Kamune Pass Certificate and Internship
2018 – 2022	Kenya Certificate of Secondary Education (KCSE) Kamune Secondary School
2010 – 2017	Kenya Certificate of Primary Education (KCPE) Gaithunu Primary School

PROFESSIONAL EXPERIENCE

01/2024 – Present	Skitech Solutions (Freelance) Founder & Lead Web Developer Managed multiple digital projects from client requirements to delivery Developed the Skitech website, now live and operational Built secure, responsive web solutions following best practices Designed visual assets such as logos and posters to enhance client branding Conducted code reviews and debugging to improve technical performance
05/2026 – 08/2026	Kenya Agricultural and Livestock Research Organization (KALRO EMBU) Industrial Attachment-ICT DEPARTMENT • Supported day-to-day ICT operations, assisting staff with hardware, software, connectivity, and general technical issues • Performed computer maintenance and troubleshooting, including routine equipment cleaning, system checks, software installation, and antivirus/security checks

- Gained practical experience in networking and ICT infrastructure, working with Ethernet cabling, routers, switches, ports, connectivity, and server-room environments
- Worked with digital records and information management, including data entry, document digitization, filing, registry processes, and file tracking requirements
- Gained exposure to organizational enterprise and information systems, including ERP, CRM, KAOP, KEEP, and KEMIS
- Applied cybersecurity concepts through practical research and awareness activities involving antivirus, firewalls, intrusion detection, encryption, and secure digital practices
- Contributed to the early development of a File Tracking System, working with HTML, CSS, JavaScript, VS Code, Git, UI/UX testing, and planning for backend, database, and authentication components
- Assisted with ICT documentation and reporting, recording technical issues, maintenance activities, repairs, and system-related observations
- Supported digital communication and content activities, including photography, video-related work, and digital marketing initiatives
- Developed professional experience in technical communication, teamwork, documentation, problem-solving, user support, and working within established organizational procedures

01/2023 – 08/2023

Digital Cyber Kamune

Technical Support & Cyber Attendant (Intern)

Provided technical support for hardware, software, and connectivity issues for 50+ daily users Operated and maintained high-demand office equipment (printers, scanners, photocopiers) Assisted clients with government portals (eCitizen, KRA), ensuring compliance Managed sensitive client data with confidentiality

KEY PROJECTS & CERTIFICATIONS

Skitech Solutions Website

Designed and developed a live business website using HTML, CSS and JavaScript, including deployment and basic security practices.

Identity Rebrand Project

Created digital branding materials and basic brand identity assets for small local businesses to improve their online presence.

Burp Suite Vulnerability Assessment

Security audits identifying XSS and SQLi vulnerabilities

Web Development Fundamentals

Completed IBM SkillsBuild training covering HTML5, CSS3, JavaScript, responsive design, front-end and back-end development, accessibility, SDLC, testing and deployment.

M-Pesa Payment API Integration

Implemented STK Push, callbacks and transaction verification using Daraja and Lipana.dev APIs.

Built backend webhook endpoints and transaction status handling logic.

Tested integrations locally using tunneling tools and deployed backend services.

Generative AI in Action

Completed advanced IBM SkillsBuild training covering generative AI, prompt engineering, foundation models, transformers, tokenization, sentiment analysis and ethical AI deployment.

Cybersecurity Fundamentals

Completed IBM SkillsBuild training in cyber threat intelligence, threat detection, vulnerability management, incident response, cryptography, social engineering and security risk management.

Career Management Essentials

Completed IBM SkillsBuild training in professional communication, interview preparation, ATS-optimized CV development, presentation skills, online professional branding and career management.

Python Essentials 1

Completed Cisco & OpenEDG Python Institute training covering Python fundamentals, procedural programming, algorithmic thinking, script design, debugging and programming best practices.

SOFT SKILLS

- Adaptability
- Time Management
- Strong Communication Skills
- Leadership & Initiative
- Critical Thinking

REFEREES

Mr. Pius Mbugua

Customer Support Manager

Digital Cyber Kamune

Phone: +254711109967
